**CHEMICAL
PHYSICS
LETTERS**

Chemical Physics Letters 257 (1996) 693–694

Instructions to authors

Letters are intended as brief reports of significant, original and timely research results in the field of chemical physics which warrant rapid publication. In considering the suitability of a manuscript for publication, the editors pay particular attention to the originality of the research, the desirability of speedy publication, and the validity of the conclusions.

Submission: Contributions, written in English, should be sent to one of the editors or, preferably, to a member of the advisory editorial board who is familiar with the research reported who will transmit the manuscript with recommendations to the editors. All manuscripts should be submitted in triplicate, of which one is a clear copy with master figures (see below).

The full addresses of the members of the Advisory Editorial Board will be found at the beginning of every volume.

Refereeing: All contributions submitted will be refereed. The editors reserve the right to reject manuscripts and to edit contributions when necessary.

Comments section: The editors welcome comments on Letters published in the Journal or elsewhere. They will be placed in a separate section. Comments will be refereed as usual and treated as normal contributions. All Comments should have an abstract.

Publication speed: The editors and publishers cooperate closely to ensure minimal publication delays. All proof-reading will be done by the publishers and proofs are not sent to the author(s). If the manuscript submitted cannot be processed immediately because scientific revisions are required or because of the author's failure to meet the length and stylistic requirements (see below), the delay thus resulting will be indicated by the addition of the date of receipt of the manuscript *in final form*.

Publication scheme: Chemical Physics Letters will be published weekly.

Page charge and reprints: There is no page charge. Fifty free reprints per contribution will be made available to the author(s). Further reprints may be ordered from the publisher; an order form is sent to contributors upon acceptance of their Letter.

Copyright transfer: Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the publisher. This transfer will ensure the widest possible dissemination of information.

Correspondence: All correspondence with the editors or publishers should contain full reference to the paper concerned, i.e. the names of all the authors, the full title, as well as the date of submission. Once the contribution has been accepted for publication, all further correspondence should be sent directly to the publishers and not to the editors (Ms. S.A. Hallink, Issue Management (Chemistry), Elsevier Science B.V., P.O. Box 2759, 1000 CT Amsterdam, The Netherlands; telephone number (020)-4852664 or 31-20-4852664 for international access, FAX (020)-4852775 or 31-20-4852775 for international access, telex number 10704 espom nl, electronic mail: X400: C=NL; A=400NET; P=SURF; O=ELSEVIER; S=HALLINK, I=H or RFC822: S.
